Outline

- **Fundamentals**
- **Questions**
- **Hypothesis and Theory**
- **CGCM results**
- **Aquaplanet**
- **Summary**

Fundamental Questions

1. Antisymmetric MHT?

Aquaplanet → Real Earth

Trenberth and Caron (2001)

Aquaplanet → Real Earth

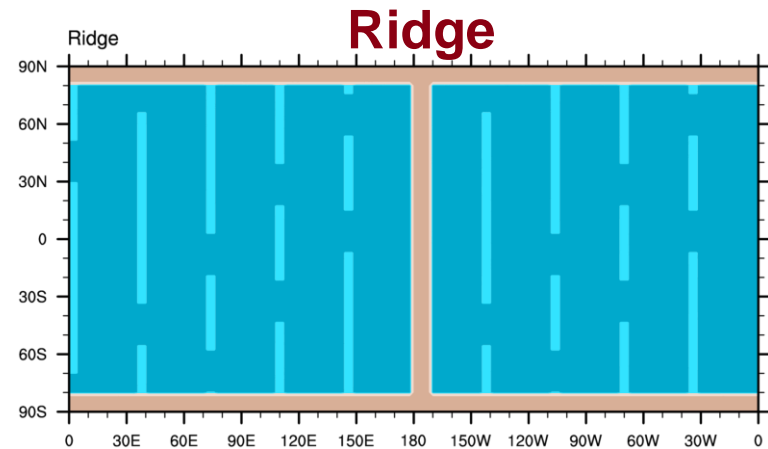

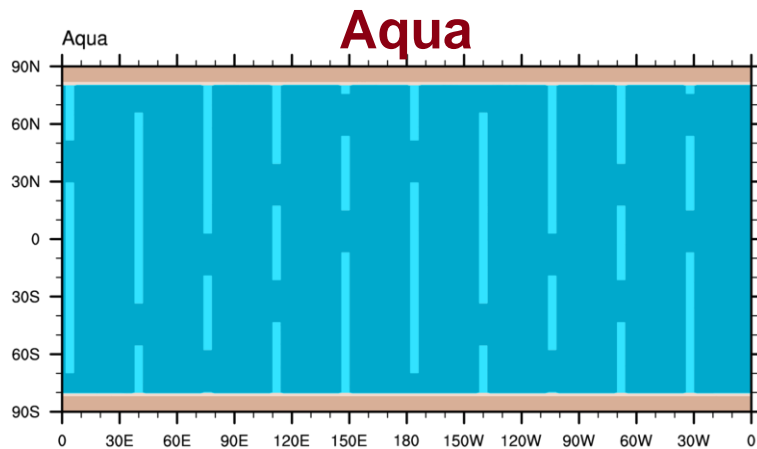

Why anti-symmetric MHT?

Try to answer this fundamental question

Topo for Aqua and Ridge

Land: 10 m; Ocean: 5000 m; Bottom random ridge: 500 m

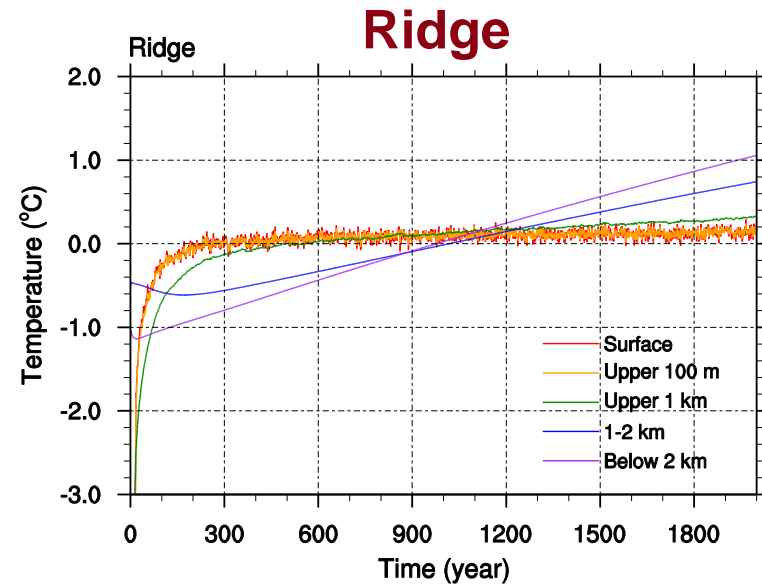

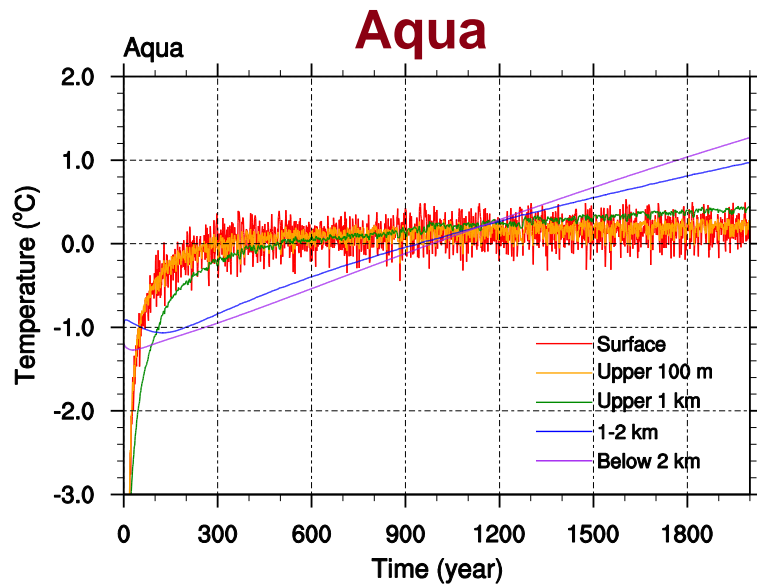

Li and Yang (2018)

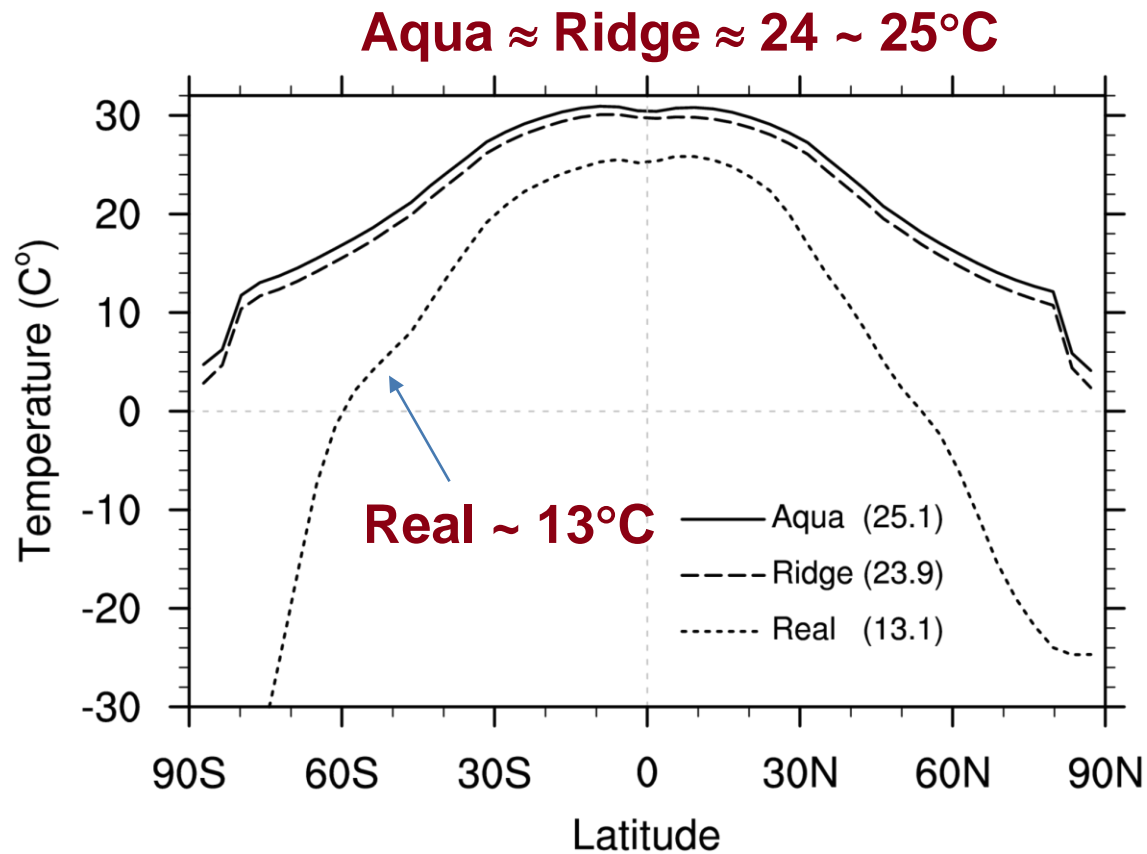

[Go to Summary](#)

Hard to Reach Equilibrium

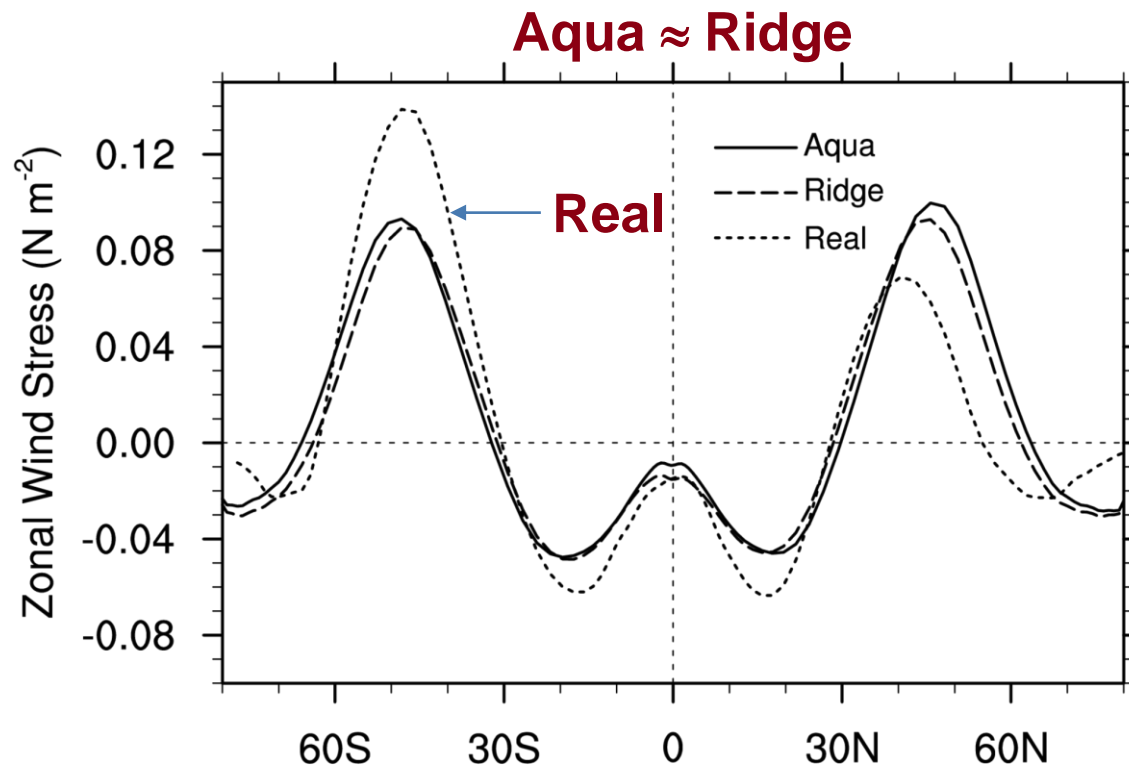

2000-year Simulation using CESM

SAT: Warmer Climate

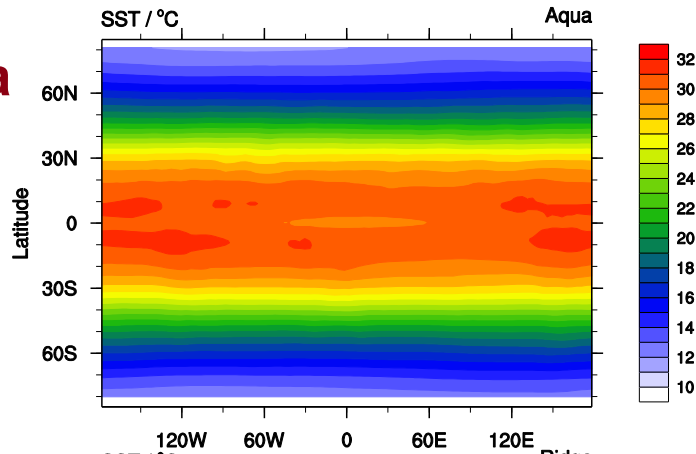

Symmetric Zonal Surface Wind Stress

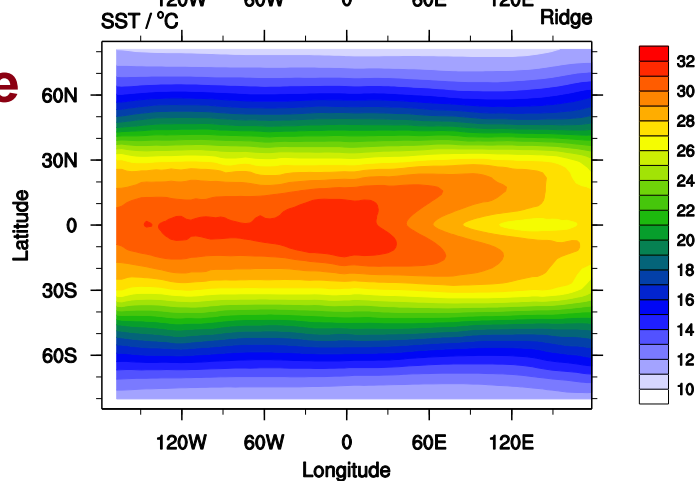

Symmetric SST and Hadley Cell

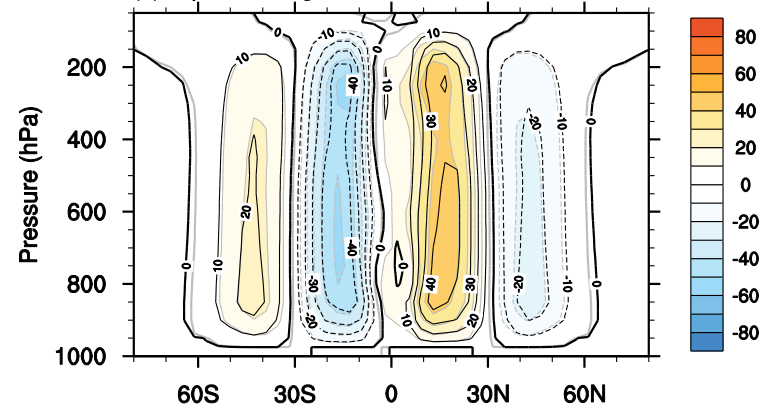

Aqua

Ridge

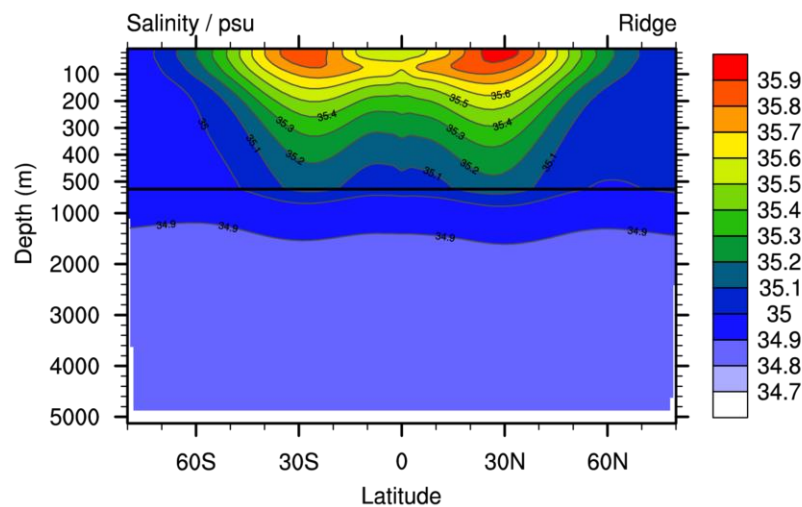

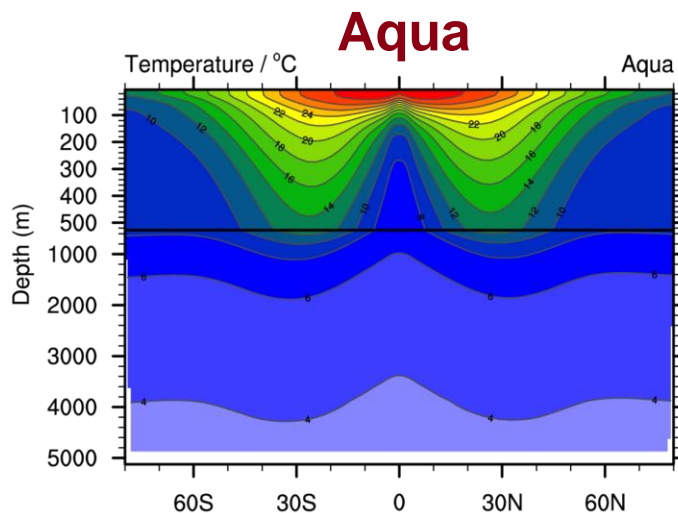

(a) Aqua vs. Ridge

(b) Ridge vs. Real

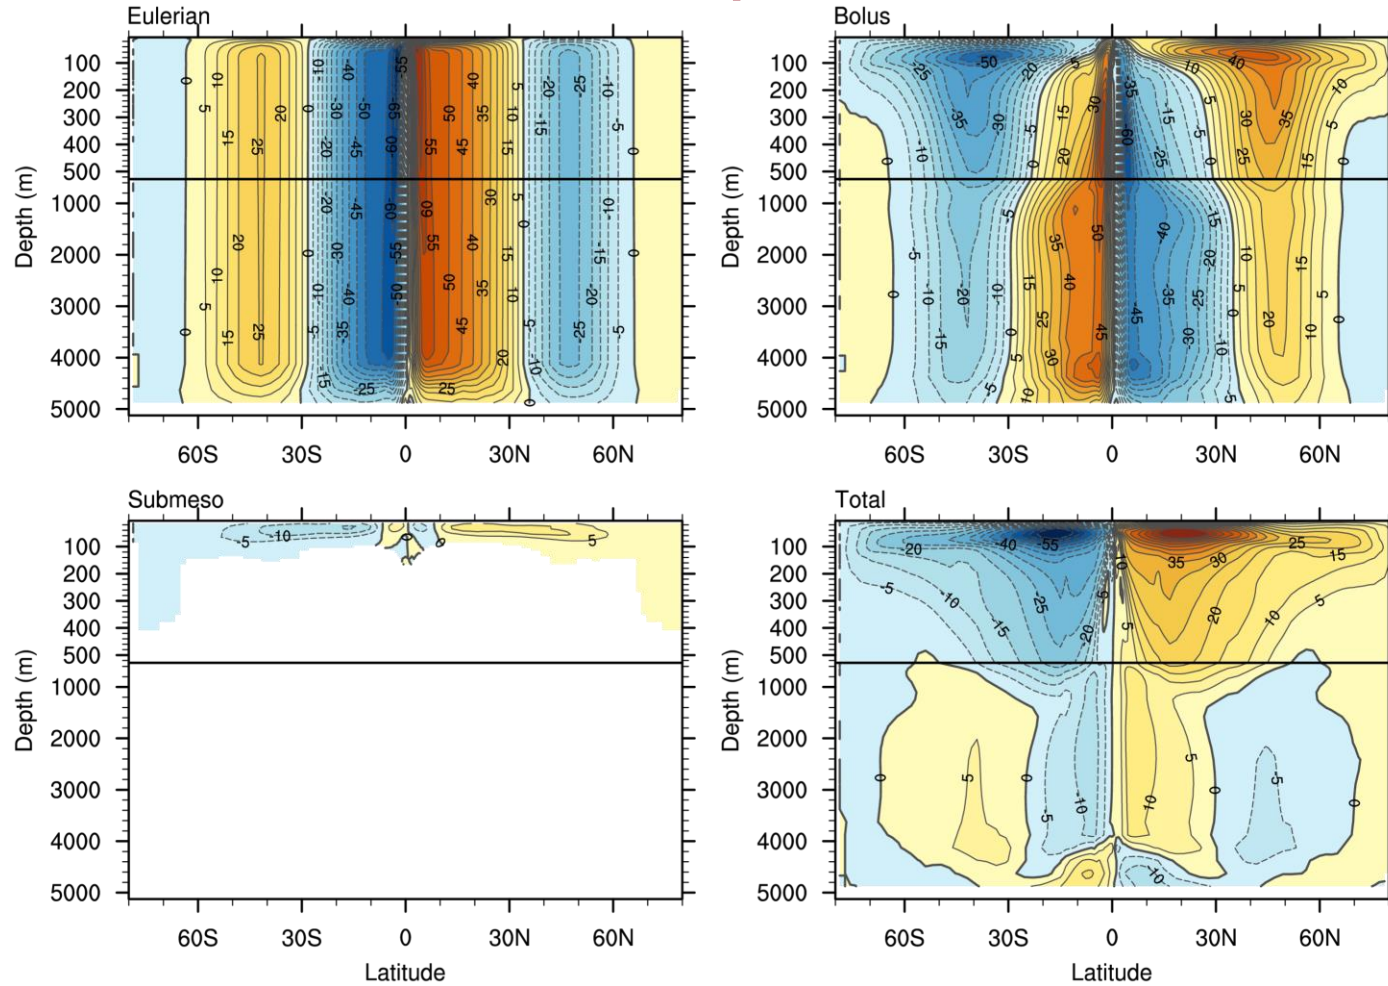

Symmetric Ocean Buoyancy

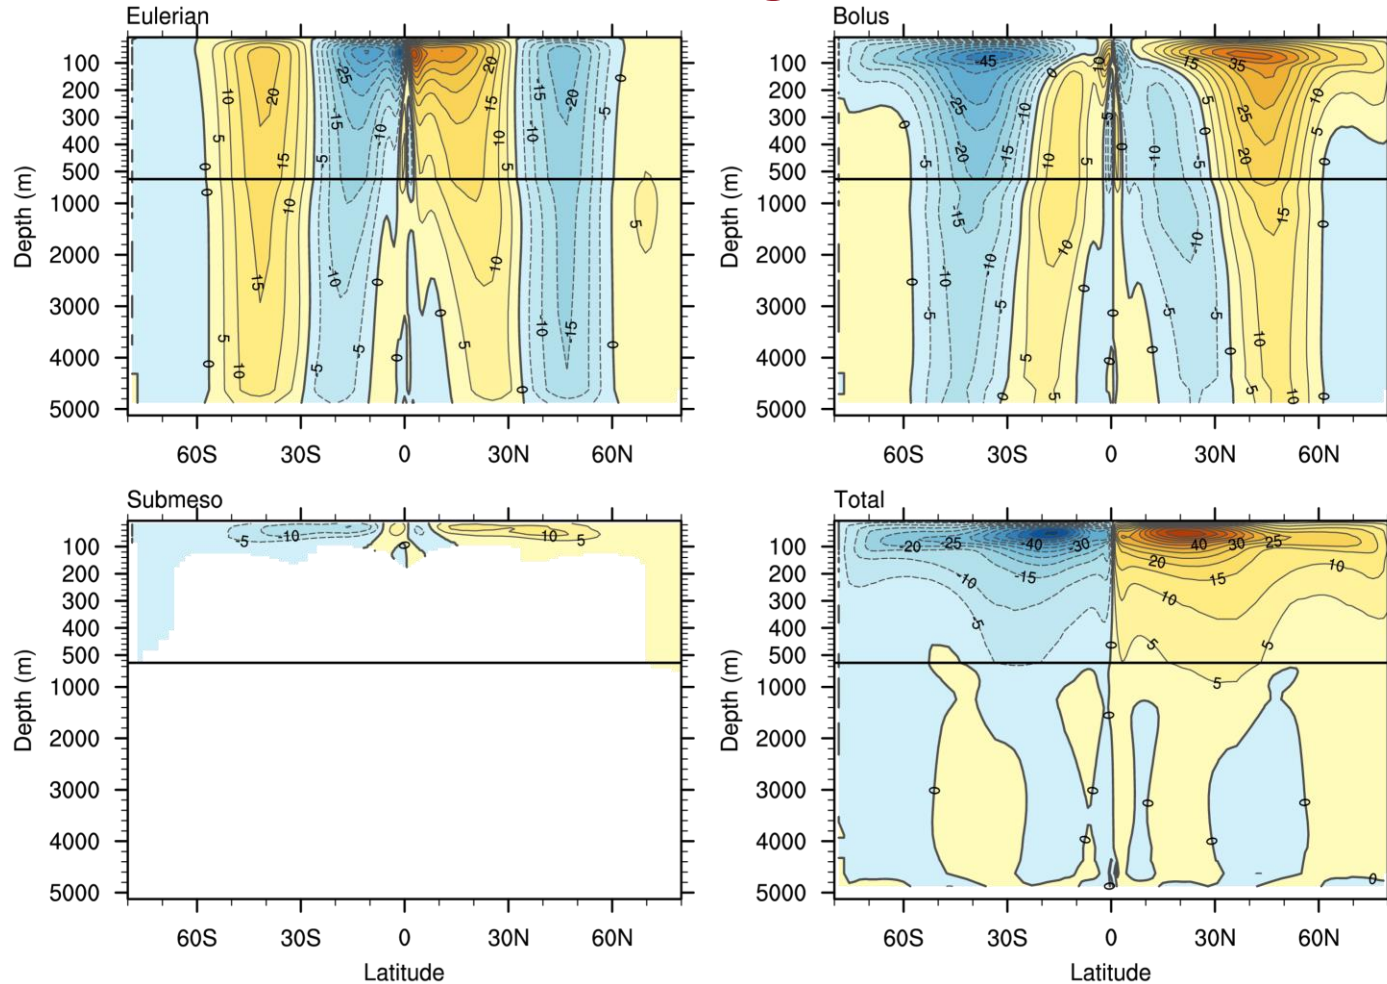

Symmetric Overturning Circulation

Aqua

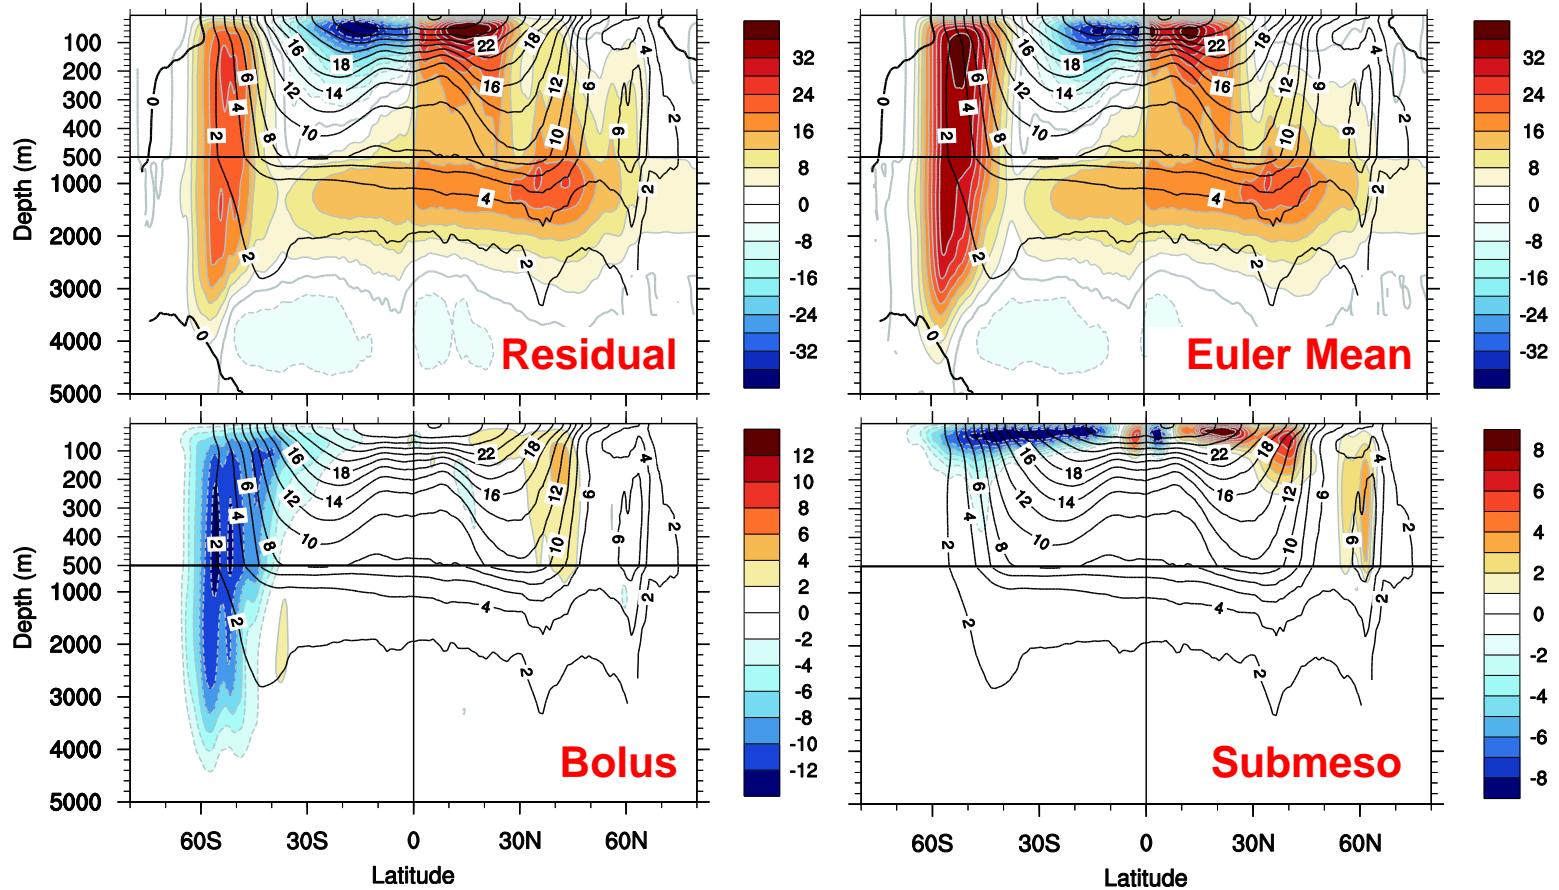

Symmetric Overturning Circulation

Ridge

Overturning Circulation in Real World

Yang and Li (2015)

Decomposing OHT_{VT}

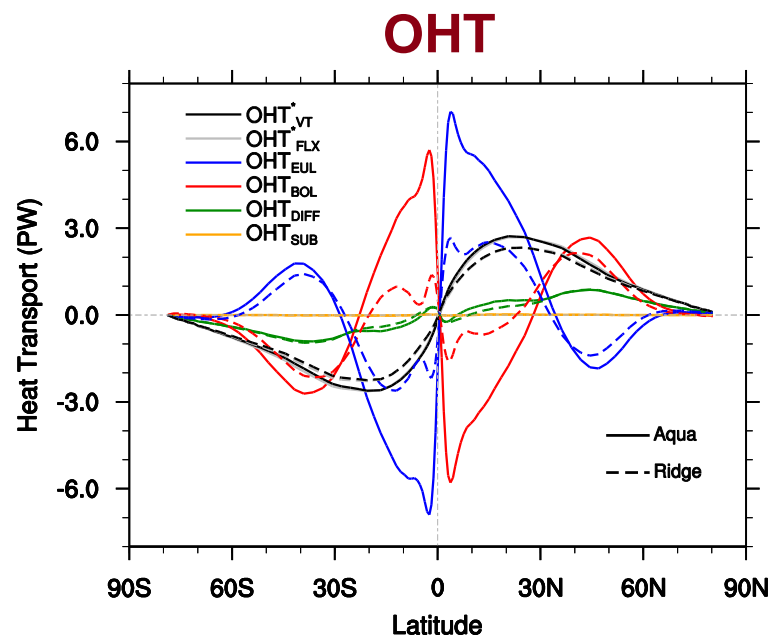

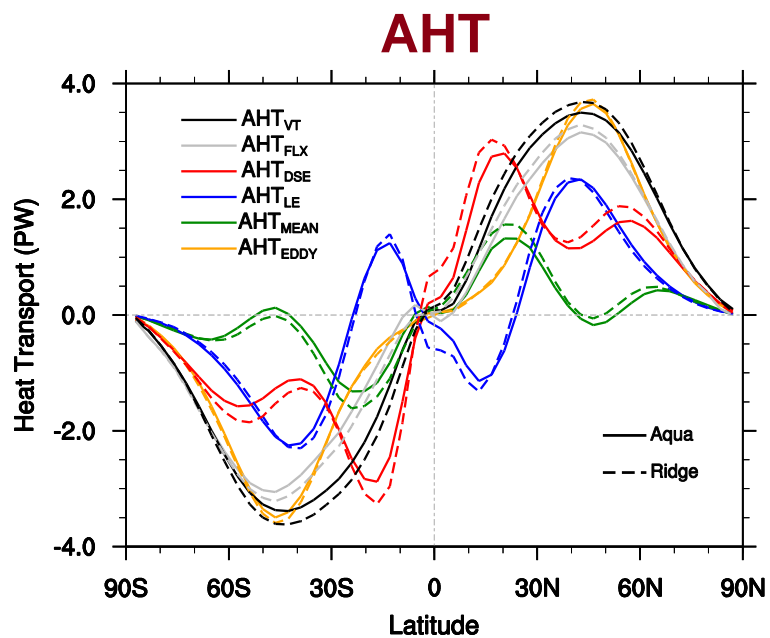

Consistency between OHT_{VT} and OHT_{HF} / Important role of Bolus and dissipation in ACC

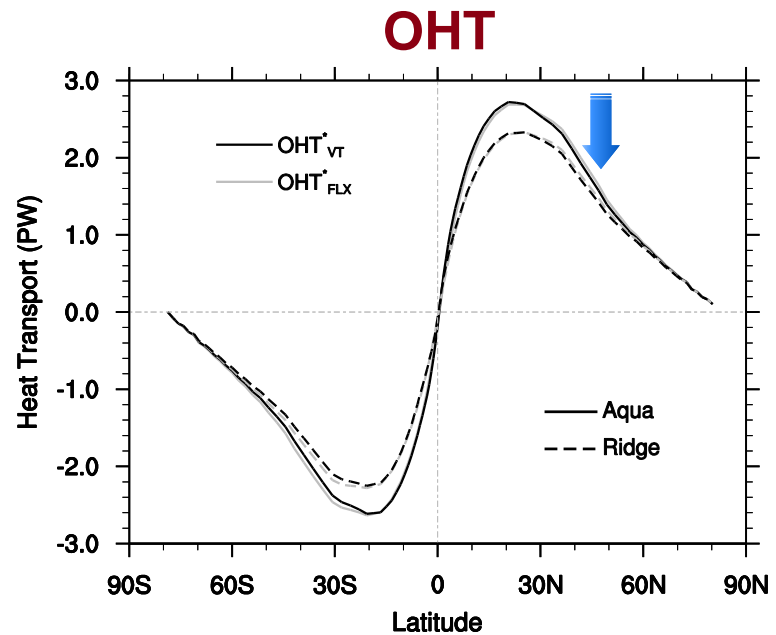

Some Thoughts to ChangMing

- **Sub-mesoscale mixing – Mixed layer mixing**
 - Window of ventilation and subduction! **Very important!**
 - Window of **CO₂, Oxygen and Heat uptake!**
- **From GM to mesoscale resolved model**
 - Comparing them to get model right!
- **In sub-mesoscale resolved model**
 - **How important the sub-mesoscale mixing**
- **Physical process:**
 - **Genesis** of mesoscale and sub-meso eddies
 - **Interaction** with the largescale background

Symmetric AHT and OHT

Symmetric AHT and OHT

From *Aqua* to *Ridge* → OHT ↓ and AHT ↑

Bjerknes Compensation

Aquaplanet → Real Earth

Why anti-symmetric MHT? Answered

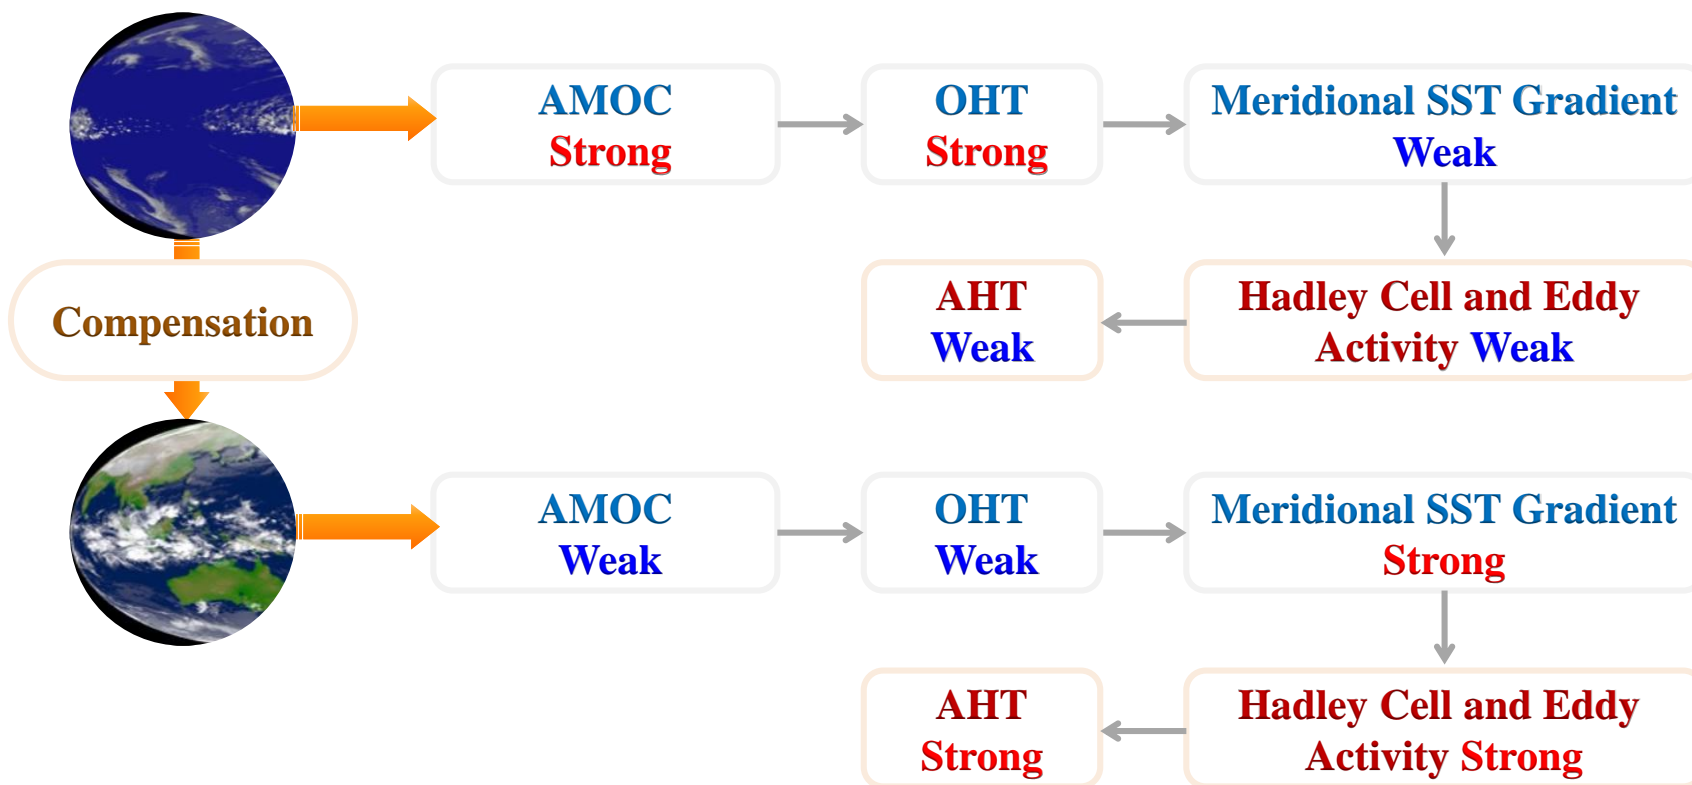

From *Aqua* to *Real*

1. OHT ↓ and AHT ↑
2. OHT → asymmetric, NH>SH, AMOC + Weaker baroclinic
3. AHT → asymmetric, SH>NH, Stronger baroclinic dT/dy ↑

→ Total MHT *unchanged*

BJC maintains antisymmetric MHT!

“Mechanism”

Yang et al. (2018)

Summary and Discussion

- ◇ **Bjerknes compensation**
 - ◇ Intrinsic mode
 - ◇ Atmospheric physics ↔ Physical oceanography
 - ◆ Climate feedback ↔ Thermohaline circulation
- ◇ **Self-constraint mechanism**
 - ◇ Climate didn't drift too much
- ◇ **If feedback → Reversibility of climate**
 - ◇ Invisible hand (?)
